1.5. What You Can Do As A Parent, Teacher, Or Concerned Citizen?

The drug merchandisers thrive on the ignorance, apathy, and irresponsibility of ordinary citizens.

YOU CAN MAKE A DIFFERENCE!

Here's how:

- (1) Educate yourself and your family about the health hazards of drugs.
- (2) Insist on no illegal drug use by youngsters. This includes alcohol, tobacco and marijuana.
- (3) Support drug education in the schools, workplace, churches and civic associations.
- (4) Rebuild understanding and respect for the laws concerning alcohol, marijuana, cocaine and other drugs.
- (5) Recognize the danger of the illegal consumer as well as the illegal supplier of alcohol and other drugs.
- (6) Support law-enforcement efforts at home and abroad.
- (7) Write letters, telephone and visit those members of the publishing, merchandising and media world who glamorize, trivialize or subsidize the drug culture.

CHAPTER 2

STANDARD GRAPHICS

The following graphs will assist you in understanding the relationship of student behavior to alcohol and other drug usage. You are encouraged to make overheads or slides from the graphs for presentations to school faculty, parents, media, and other audiences in the community.

The *Frequency of Use* graphs show the percent of students at each grade level who report any use of the various drugs. The graphs are divided into *Gateway* and *Illicit* drug categories.

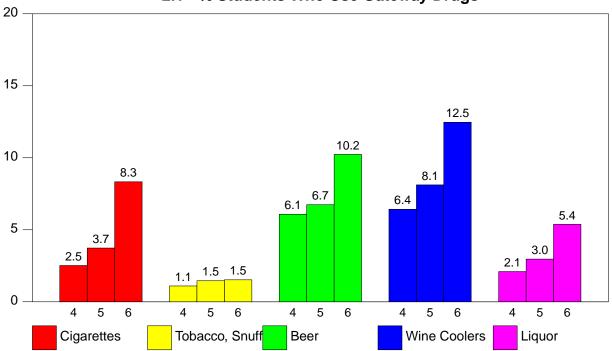

The *Perceived Harm* of alcohol and other drugs will assist with understanding how the false assumptions concerning harm are related to drug use. When drugs are perceived as harmless, the probability of use increases. These graphs show the percent of students who marked *Yes* or *A Lot* on the question *Do You Think The Following Are Harmful To Your Health*.

Research indicates that easy access, *Availability*, to drug increases the probability of use. Availability of alcohol and other drugs normally increases at higher grade levels. These graphs show the percent of students who marked *Easy To Get* on the question *How Easy Is It For Kids Your Age To Get*.

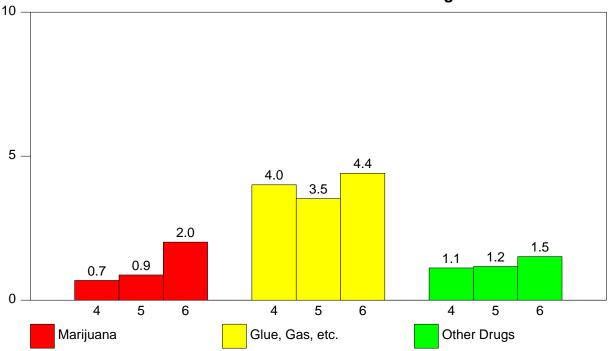

Data collected in past years using the **PRIDE Surveys Questionnaire** indicate a high correlation between friends use of drugs and an individual students use of drugs (i.e. a student who reports use of drugs by friends is more likely to use drugs). These graphs show the percent of students who marked *A Lot* on the question *How Many Of Your Friends Use*.

CHAPTER 3

PERCENTAGE TABLES

This chapter contains your school survey results in tabular form. Each table corresponds to an item on the questionnaire. The tables contain percentage data by grade level, (grades 4 through 6), and *Total*. The *N of Valid* column contains the number of students responding to the item and the *N of Missing* column contains the number of students not responding to the item. The remaining columns contain the percentages of students responding to the particular response categories.

The percentage tables of the report appear in the same order as corresponding questions on the questionnaire. The Table of Contents contains the percentage tables by section and gives the page number where each section is located. The List of Tables contains the location of each individual table.

The last section of tables presents the frequency of drug use data with the categories *collapsed* as follows:

Weekly Use - 1-7 Times A Week

Monthly Use - 1-2 Times A Month + 1-7 Times A Week

Annual Use - 1-6 Times A Year + 1-2 Times A Month
