Powerful Tools to Assess Teaching and Learning Environments

The Pride Learning and Teaching Surveys recognize that a well-rounded, solid education consists of more than teacher evaluation methods and student scores on high-stakes tests.

Without measuring the overall conditions for learning at a school – from the viewpoint of both teachers and students, administrators do not have all the information they should to make informed policy decisions.

Pride Learning and Teaching Surveys provide a context by which whole schools are measured. Students, teachers and administrators as a team, not as individuals, can then address the weaknesses within a school, and build upon the strengths.

Both survey questionnaires have undergone more than three years of psychometric testing of responses drawn from 72,000 teachers and 240,000 students. Data produced by the Pride Learning and Teaching Surveys have been found reliable and valid, and they strongly correlate to academic achievement.

The survey development team’s mission was to maintain the high level of accuracy and usefulness that our school clients know and trust from our data.

Since 1982, ISA has conducted more than 58,000 school level surveys and compiled responses from more than 13 million students, faculty members, and parents.

An intuitive electronic dashboard takes the guesswork out of interpreting survey findings by graphically displaying large data sets in easy to interpret domains (categories) and scales that are unique to Pride Surveys.
What Do You Get?

**On the following pages,** we list the topics covered on the new surveys and we identify the matching questions that appear on both questionnaires. Topics identified with a \* sign are assigned a scale score (responses to several questions are transformed into a single score). Scale scores allow you to quickly determine overall strengths and weaknesses.

**Electronic Dashboard for Your Findings.**
Your survey findings will be delivered to you through a user-friendly, secure, electronic dashboard. Advanced drill down functionality will guide you intuitively from summarized to detailed data.

For example, if the overall scale score for Student Engagement showed an area of concern, you could drill down with a mouse click to reveal a more detailed explanation of what individual factors influenced the lower scale score.

**Reasonable Cost.**
The cost is reasonable – less than one hundredth of one percent (.01%) of the average annual per pupil expenditure. If you are ready to start the survey process, please use the online order form located at www.pridesurveys.com.

**Timely Return of Your Findings.**
Pride Surveys returns your survey findings within two weeks of receiving your completed questionnaires. You can find the actual survey questionnaires in your packet.

**Want to Know More?**
To learn more about these surveys, or to arrange a one-on-one demonstration of the electronic reporting platform, please feel free to contact us.

A NOTE ABOUT CUSTOMIZATION

This document refers to our standard Learning & Teaching Environment Surveys. Our development team endeavored to create questionnaires that:

• Provide the most well rounded look at Learning & Teaching Environments

• Gather actionable data

• Can be sustained by research and factor analysis

• Respect students’ and teachers’ time

State Education Agencies (SEAs) and large school systems (usually >25,000 student membership) often ask us for customized survey questionnaires and reporting systems.

Customization can be addressed in two ways:

1. All of our standard questionnaire forms allow for the inclusion of ten additional questions that can be added by the Local Education Agency (LEA) or State Education Agency (SEA).

2. Survey questionnaires can be designed from whole cloth, or existing questionnaires can be revised to meet LEA or SEA needs. Pride Surveys has created more than 75 survey questionnaires in consultation with state and local agencies, including 33 statewide surveys.

For any questions regarding customized surveys contact:
